

3. (a) The diagrams below show an animal cell and a plant cell.

- (i) The lines from the boxes show the positions of two of the parts that are present in both cells.

In the boxes, write the names of these **two** parts.

2 marks

- (ii) Give the names of **two** parts that are present in plant cells but **not** in animal cells.

2 marks

1. _____

2. _____

- (b) Organs can carry out their functions because of the special cells they have.

Draw a straight line from the name of each type of cell to the function of the cell and then to the process it carries out.
One has been done for you.
